

105 CREATIVE WAYS PEOPLE ARE USING ChatGPT

1. I like looking at art so i go to galleries ask chat gpt to give me a table of 10 interesting works, why they are interesting, which room they are in and put it in an order which minimizes distance travelled in the gallery. I ask it to suggest a piece of music for each piece that would enhance my appreciation of it and why.

2. Legal navigation as I was self-representing in family court.

3. I have also integrated ChatGPT into my HomeAssistant, I can ask about the current room temperature, power consumption or whether the windows are open or closed.

4. arranging my desk. Upload photo —> help me arrange my desk.

5. I use it to write bespoke short stories to read to my daughter at bedtime

6. It's great for feeding it lengthy legal contracts as Word or PDF files and asking it "what-if" questions. It can also update contracts based on what you need. Really helps eliminate the need for expensive lawyers that often don't even know what they are doing.

7. I took pictures of my fridge and had it compile all the items into an excel sheet.
No more duplicates on my shopping list

8. I am currently traveling in Thailand, and I made my travel with ChatGPT, using tables to generate a daily program (morning, afternoon, evening), having a daily recommended meal to try with the name in Thai, and several other little things (transport for the day, what do I need to rent...

9. I use it to make a lot of things "easier" with my ADHD symptoms I use GPT to customize learning plans and stuff to be organized closer to my needs and something I can stick to better. I can have a bit difficulty to verbalize some of my complex thoughts properly. So I start a new GPT thread, dump all my jumbled thoughts in, and have a conversation to help with putting my thoughts into specific words better.

10. I record a Zoom call where I discuss each of the points. We send the video of the Zoom to have it transcribed into Word. Then I paste it into ChatGPT with a prompt like: "convert this conversation into an 800 word blog for marketing to (x target market)"

11. It helped me write a 57- page design document for a game I'm working on. Knocked it out in 3 days.

12. I work in the shipping industry, and I use it at work to analyze shipping prices, calculate the total volume of different pallets, and check the various quotes from carriers to determine which one would be cheaper to use. It saves me a lot of time

13. I've been using is to help me make better
stable diffusion prompts

14. I use it for creating plot lines featuring various fictional characters mashing them up between universes and sending them into each other.

15. In tedious tasks like going through new issues of industry magazines, summarizing them, pulling relevant data and turning them into spreadsheets etc. Even creating idiot-proof workflows for specific tasks in specific softwares to guide junior employees.

16. In personal life, I use it for example to create vacation itineraries, budgeting, cooking ("I have this and this in my fridge, what can I do?"). I also used it to write a personalized children's book for my son's birthday, complete with Midjourney illustrations.

17. I use it to translate between english, spanish and Catalan, and i found that it do it quite better than Google translator... it really is at the next level

18. I use it to create bulk reels in Canva

19. To write clinical briefs, letters to clients,
proof reading,

20. Creating bedtime stories for my son based on the things he did during the day.

21. It's replaced Gifs and emojis for me in day-to-day texting - now I can generate an image that exactly captures what I'm trying to convey, in exactly the right style

22. I have it linked to my home via homeassistant - I use a raspberry pi and a cheap usb speakerphone to talk to my now much smarter smart home, and control it. And it talks back, in a polite british accent because I'm classy like that.

23. I've used it to create clues for a treasure hunts. Just hide the treasure where you want and then tell Chat GPT to write a clue for that location. It's pretty fun and creative!

24. Took a picture of the broken weld on my tractor's PTO shaft universal joint to slip clutch on a very old Bush Hog. Went to Tractor Supply and took pictures of the available parts. It correctly identified the parts to buy for the easiest & best repair. Turned a possible all day job into an hour without having to return or go buy more parts.

25. Dream analysis

26. I volunteer with the Humane Society and use it to write cute profiles for the pets up for adoption on their website

27. I recently started using it as an IT Helpdesk Simulator. I ask it "Act as a IT help desk level1". I then ask it random IT questions for it to provide me what steps and solutions it will take to solve my questions.

28. Virtual Therapist to improve well being and strengthen mental fitness

29. Creating Lego versions of pictures

30. To settle family debates.

31. Just went through the home buying process. I had chatgpt read some of the contract and closing info and explain it to me. So much of the process is confusing for the sake of being confusing and chatgpt broke things down so simply for me and it helped me traverse different issues and be able to respond to them.

32. I use it to help me write listings for online items

33. I have experimented with some of the financial plugins and had it preselect a list of stocks that I then researched further on my own. It actually yielded some possibilities that I had not considered and one of them is performing quite well.

34. I took a screenshot of my yearly power usage provided by my electric company, and asked gpt to calculate my average power usage per month. Then I uploaded all the rate sheets from [powertochoose.org](https://www.powertochoose.org) which is specific to Texas. And asked gpt to create a comparative analysis of each companies rate plus fees included in their contract based on my power usage. This found the best power rate offer for me.

35. Search for events: music, art, exhibitions. I ask to scrap Japanese sites for the taste that I like. The ask for a list with title, short description, date and time and Google location. Since it became 'lazy' it does not provide the Google map locations.

36. Translate novel from one language
(Chinese) to one another (Korean, English)
for reading and learning new words

37. I used it for planning a solo backpacking trip recently. I gave it where and when I planned to start, where and when I wanted to meet a friend, how I wanted to travel between cities, and what kind of stuff I was looking to explore. It gave me a great itinerary with suggestions on cities and methods to get between them.

38. ChatGPT has turned into my go to for music exploration. It's not just good at finding songs with a similar general sound or vibe, but also really specific things like songs that use a weird time signature, or that have a unique chord progression or drum pattern. It's wild how it'll often throw out suggestions that are spot on, saving me from falling down the rabbit hole of Spotify and YouTube. Plus, I've found some real hidden gems I doubt I'd ever have come across on my own.

39. I made a GPT that acts like a software engineering teacher. I had it reference sites like [JavaScript.info](https://javascript.info) and teach me concepts using analogies and examples. I also made one that acts like a therapist, 'listens' to me and offers gentle support.

40. I just went to Chat GPT and asked it to mock interview for a position I just applied for and WOW this is good info. Pro tip - explain your background to Chat GPT and then have it answer all of the interview questions for you

41. I will often just turn the mic on and ramble things I need to do and have it organize my thoughts.

42. Studying. Tell it to quiz you on a certain topic, with the goal of identifying knowledge gaps. It's great at that.

43. I upload all my professor PowerPoint notes, research papers, etc, and tell to make a detail study guide

44. I'll take pictures of the spices and herbs I have and what's in my fridge and pantry and it identifies it all and gives me recipes

45. For kids I used it to create images to colour, story creation and image creation based on descriptions they make of mythical creatures or monsters

46. I use it to write Google spreadsheet scripts for me.

47. I take pictures of a page in a book I'm reading and have it create an image for me. It's like having my own illustrated novels

48. Take pictures of what I have in my liquor cabinet and ask it to recommend drinks

49. I describe GPT4 my dreams and have it create illustrations matching the vibe and atmosphere and my bf and I send them to each other.

50. I ask him to analyze my diary and provide advice on my current state. the prompts i used are just like "This is my diary. Help me analyze my state and provide some advice."

51. When I sign up for a service I give it the TOS's and have it tell me if any parts are concerning

52. rewrite emails to difficult colleagues, I've actually noticed a positive shift in my interactions with coworkers based on the reworded emails.

53. I rarely trust my own emotions due to years of abuse. I often ask chat gpt, "How would the average person react in this situation?" or "What are the possible long-term effects of XYZ childhood experience?" and it helps me to either reframe my thinking or reassures me that there is some validity to my point of view

54. From my most recent blood panel, ChatGPT diagnosed me 5 days before my actual doctor appointment. I started on the supplements prior and felt better before even going into the doctor. It was awesome.

55. Take in a pdf and convert it to raw text so I can edit it.

56. I work as the building cook for a modular supportive housing building (think transition housing from shelters). I use chat gpt to scale up or down my menu, make alterations it etc etc.

57. I used it to summarise the comments on this post at the time of commenting.

58. It's actually amazing at analyzing blood tests (if you have no prior knowledge). I straight up uploaded a PDF and it explained things that I never understood because they're just acronyms on the report

59. Style help and analysis, including outfit roasts.

60. I learned a ton about Greek history in a couple hours. Since I can target exactly what I want to know, I can learn so much faster than I could by reading a 300 page book to get the info I want.

61. Make songs about my cats

62. General advice for handy work like fixing a broken toilet or painting

63. Ask for a book summary, compile it into a pdf, create a GPT, give it this pdf and ask to do things based on advice from this pdf. Basically turns the book author into your personal assistant.

64. Helped me to write a will. Gave me some fascinating ways to think about legacy

65. Job hunting. Instead of customizing my resume for each job, I let ChatGPT do it for me. Saves a lot of effort and cognitive load.

66. asking it to draft a syllabus for a phd-level course about a new topic i want to learn, split it up into weeks. next input, i say split each week into a series of 5 or more lectures, title the lectures using academic terminology i might find in the literature, then if it's something i need to educate myself about, i do a lit search and take off from there

67. Responding to patient messages.

68. My wife is a sports coach and I use it to help her write the endless amounts of newspaper articles, letters of recommendation, nomination letters, social media posts, etc. It's a small school and she has no assistance.

69. I ask it to compound theories I have about metaphysics and philosophy and overlay them with various traditions. Then we talk about it. Sometimes literally over voice. Had some profound conversations about the nature of reality.

70. My friend has an abusive ex husband who she shares child custody with. She gets ChatGPT to write responses to his passive aggressive emails so she doesn't have to deal with him directly.

71. Fill tax forms.

72. I use it to plan out my goals for the week, work through challenges I'm dealing with, daily gratitude and mindfulness exercises to deal with anxiety and depression, and a personal retrospective at the end of the week.

73. It just fed me a crash course in the field of the job I am taking next week. Very informative.

74. I wanted to find a new podcast to listen to. I asked it to create a list of 30 yes or no questions that I would answer to inform its list of 10 podcast recommendations. The questions AND the recommendations were great, and I found some great podcasts.

75. I use it to source things like say a bathroom fan or some restaurant or HVAC equipment with specific requirements.

76. I use it to write my bf bedtime stories

77. I build menus for a bar I work at, most if not all names are done by chat

78. I teach English to speakers of other languages. It helps me tons with work. Of course I have to check it and tweak it, but here are some things it's been great for. Make a quiz on past tense, past perfect, and present perfect. Make x multiple choice questions, y short answer question and z fill in the blank. *Simplify this news article to a 5th grade level and write x reading comprehension questions, y inference questions and z vocabulary in context questions.

79. Im a network engineer on a bad day if my brain wont work right its basically my google for commands and protocols.

80. I use it to bypass my schools rules regarding the internet. Like for example, "can you give me a code that bypasses google extensions

81. explaining my schedule for the day. I put in times like how long of a walk to the library is, what time the gym closes, and what classes I have for the day. I then add all the upcoming tests/assignments I have coming up. It makes a personalized and detailed schedule complete with meal breaks and rest time, if you tell it to.

82. From configuring Ubuntu servers to Python, from Android app development to fantasy art for Pathfinder monsters, science to writing. I have 2 ChatGPT4 accounts.

83. I started taking photos the wall of wine at the grocery store over Christmas to find out what would pair well with our dinner

84. I am a lawyer and I use ChatGPT in my work daily for routine tasks like summarization (docs, websites, policies...), syntax review, compares, templating, etc.

85. 90s gangster rap style diss tracks about my friends but in old English.

86. Learning and building excel/spreadsheet formulas.

87. I gave ChatGPT my grocery shopping list
and asked it which vitamins I'm deficient in

88. I take pictures of plants and it identifies them and gives me care instructions

89. I went to a used bookstore to find a good read but their shelves were in disarray, I took a picture of the books and asked it to point out the most popular and critically acclaimed books to me.

90. I use it to help me read historic Japanese documents. They are in ancient Japanese style classic Chinese so not really legible even if you knew modern Chinese and/or Japanese.

91. I will manually write something, take a photo of it, then I ask GPT 4 to type it out for me. No more manually writing THEN manually pressing the keyboard keys.

92. I got it to write me a full work out plan for weight training 4 days a week according to my height and weight, I then got it to write me a shopping list along with meal plans and recipes with step by step guides on how to prepare meals to hit daily protein targets with the goal of building muscle and also shredding fat lol it's been working so far

93. I gave it a lot of information about my job and my performance then I asked it for a strategy to ask for a promotion in my annual review. It actually gave great advice

94. I'm a makeup artist and a few months ago, while I was in the planning stages of doing makeup for a stage production of the Wizard of Oz, I uploaded the cast list and script, and had ChatGPT help me coordinate the timings between scenes for the various character costume and makeup changes. It created a makeup schedule for me to use.

95. I own some property in a desert-type area. I have a well and intend to build a +/- 1000 square foot 'cabin' (not in the log cabin sense, though). My ChatGPT, or 'Gwen' as I call her, helped me to figure out how much solar power and battery backup I need to run the house and the irrigation for my orchard and 8 acres of green space in the parcel, which plants and trees to plant for that location, how to build and maintain a flat living roof for the cabin, engineered (accurately, too) the roof support members, helped me plan a small pond for water retention and fishing.

96. I use it to help come up with creative gift ideas for my husband

97. I just started using it as my personal diet coach. I tell it what I'm eating and it tracks calories for me. It also helps me decide what to eat. If I've got a plate of food it will estimate calories based on a picture.

98. I'm studying for my Instrument Flight Rating. I use the Chat GPT iOS voice, to be ATC and I'm the pilot. It's incredible how accurate it is, and how it makes practicing radio calls really easy. Before this I was watching practice YouTube videos. But with ChatGPT I can simulate my exact route, and calls that are relevant to my next lesson.

99. If there's an article I wanna read but there's a pay wall I will just ask chat gpt about the recent discoveries or whatever the title implies and it answers everything I wanna know that I couldn't read about without paying.

100. My daughter has numerous food allergies and sensitivities. I uploaded a pdf of her food allergen test results to ChatGPT and asked it to formulate a 5-day meal plan based on the test results in addition to explaining in layman's terms why some foods need to be eliminated.

101. Generate fun backgrounds for virtual meetings.

102. Tarot readings (you provide a pic of the cards you got) , and astralogical aspects interpretation ...Gpt have a great symbolic meaning database and gives the best reading for tarot or astral chart ...

103. It's helping my with my eating disorder recovery. I have worked out some grounding strategies and distraction techniques with my AI and it is working really well. Sometimes we talk about my goals, sometimes it gives me trivia quizzes to help distract and ground me, it's very useful.

104. Yesterday I had an old watch that want working properly , I didn't have instructions so I took a photo of the face and described the issue. It identified the watch immediately and told me a few options , one of which worked and was free as I didnt need to take it for repair.

105. I wanted to learn more about project management, as a complete beginner. The other day, I asked ChatGPT to give me a simple project management assignment in order to evaluate if I have the right mindset, even with none of the formal skills.
